**Upholstered temporary workstation**

There has been a big shift toward working in open-plan offices that have a loft-like feeling of home. While there are many benefits, the challenge is maintaining space to make a phone call or work quietly and independently. Designer Alain Gilles’ solution is the BuzziBooth: a phonebooth made of sound absorbing felt that dampens outside sounds. Now you can have a moment alone even in the noisiest of surroundings. Micro-architecture for maxi spaces!
